

Puget Sound TRT
Fourteenth meeting—Tuesday-Wednesday, May 8-9, 2001
NWFSC—Montlake Lab, Seattle
DRAFT Agenda

Tuesday, May 8

9:00 am Viability group (Sands et al.)

1. PVA methods and results

a) draft report on mostly methods and testing models (will probably not be out before the meeting, so may want to pass it out and give everyone an hour to read, digest, and then have comments on it). **Note: be sure to read through co-manager** (Jim S. handed out lots of documentation at the April 10th mtg) **and SimSalmon methods** (the documentation for how it works without harvest incorporated is on DocuShare) before the meeting on Tuesday.

b) Results of analysis of NF Stillaguamish - perhaps SF too.

2. Historical abundances –

a) what we have to date, what more is being done.

b) Results for NF Stillaguamish

3. Historical habitat estimates -

a) status of work

b) Results for NF Stillaguamish

4. Comanagers results for NF Stillaguamish - if not final at least preliminary that we can use.

5. Putting together the four approaches to get pop viability/recovery goals – discussion and brain storming!

6. Report for Shared Strategy (need draft by May 18th)
and the Shared Strategy retreat June 7-8

4:00 ADJOURN

Wednesday, May 9

- | | |
|---------|--|
| 9:00 am | Shared strategy progress (All)
June 7-8 retreat, Steps 1 & 2 |
| 10:00 | Habitat group (Fuerstenberg et al.)
grand plan for habitat-related analyses and what technical advice/results we can provide to the watersheds by when, update from Beth Sanderson and Lisa Holsinger on habitat capacity estimates. |
| Noon | LUNCH |
| 1:00 pm | Looking ahead—"unified theory" (All)
discuss priorities for TRT projects, including chum and sockeye biology, nearshore assessments, coordination of timelines and work products, M&E guidance, effects of/recommendations for H's. |
| 2:00 | TRT business (All) |
| 3:00 | ADJOURN |
